

## REMARKS

Applicant respectfully requests reconsideration of the present U.S. patent application. Claim 3 has been objected to because of certain informalities. Claims 1-17 stand rejected under 35 U.S.C. § 103. Claims 1, 18 and 19 have been amended. No claims have been canceled or added. Therefore, claims 1-19 remain pending.

### Claim Objections

The Examiner objected to claim 3 because, according to the Examiner, the word “case” should be after the word “module” in line 1. Applicant respectfully points out that claim 3 was previously amended to correct this informality. Applicant therefore respectfully requests that the Examiner withdraw the objection to claim 3.

### Claim Rejections -35 U.S.C. § 103

#### Rejections of Claims 1-17 based on *Uno* and *Takenaka*

Claims 1-17 were rejected under 35 U.S.C. § 103 as being unpatentable over U.S. Patent No. 5,074,682 issued to Uno et al. (*Uno*) in view of U.S. Patent No. 5,381,499 issued to Takenaka et al. (*Takenaka*). For at least the reasons set forth below, Applicant submits that claims 1-17 are not rendered obvious by *Uno* and *Takenaka*.

Claim 1 recites the following:

A laser module case comprising a snout through which an optical fiber assembly may be passed, the snout disposed through a wall of the case, wherein the optical fiber assembly is movable within the snout so that it may be aligned with a laser within the laser module case after the laser module case is closed.

Claims 14, 16 and 17 recite similar limitations.

*Uno* discloses a semiconductor laser module and a method of positioning the components thereof. See col. 1, lines 49-51 and 56-58. Applicant agrees with the Examiner that the optical fiber assembly in *Uno* is fixed relative to the snout. See Office Action page 2, paragraph 3, lines 6-7. Thus, *Uno* fails to disclose that an optical fiber assembly is movable within a snout so that it may be aligned with a laser within a laser module case after the laser module case is closed, as recited in claims 1, 14, 16 and 17.

Applicant does not necessarily agree with the Examiner's other interpretations of *Uno*. Discussion of such interpretations is not necessary to address Examiner's rejections in the Office Action. Applicant reserves the right to refute such interpretations if necessary in connection with subsequent office actions.

Examiner cites *Takenaka* with regard to the above-referenced deficiency in *Uno*. See Office Action, page 2, paragraph 3, lines 8-11. *Takenaka* discloses a lens mount (first support), a unit holder (second support) and a laser mount (third support). See col. 5, lines 25-27. An optical isolator is placed in the lens mount, a ferrule carrying an optical fiber is fixed to the lens mount, and these components are assembled into an integrated unit. See col. 5, lines 29-33. The unit holder is then secured around the integrated unit, and the lens mount and laser mount are fixed to the unit holder, forming part of an optical assembly unit. See col. 5, lines 36-47. The optical assembly unit is soldered inside a package, and the optical fiber is solder fixed to the package. See Fig. 1; col. 5, lines 47-52.

Therefore, *Takenaka* does not disclose that an optical fiber assembly is movable within a snout so that it may be aligned with a laser within a laser module case after the laser module case is closed, as recited in claims 1, 14, 16 and 17. Consequently, *Uno* in

view of *Takenaka* fails to teach or suggest at least one limitation of claims 1, 14, 16, and 17. Applicant therefore respectfully requests that the Examiner withdraw the rejection of claims 1, 14, 16 and 17 under 35 U.S.C. § 103.

Claims 2-13 depend from claim 1. Claim 15 depends from claim 14. Because dependent claims include the limitations of the claims from which they depend, Applicant submits that claims 2-13 and 15 are not rendered obvious by *Uno* in view of *Takenaka* for at least the reasons set forth above. Applicant therefore respectfully requests that the Examiner withdraw the rejection of claims 2-13 and 15 under 35 U.S.C. § 103.

Applicant respectfully points out that Examiner failed to address claims 18 and 19 in the Office Action. However, Applicant submits that claims 18 and 19 are not rendered obvious by *Uno* and *Takenaka* for at least the reasons set forth above.

#### CONCLUSION

For at least the foregoing reasons, Applicant submits that the rejections have been overcome. Therefore, claims 1-19 are in condition for allowance and such action is respectfully solicited. The Examiner is respectfully requested to contact the undersigned by telephone if such contact would further the examination of the present application.

Dated: November 28, 2005

Respectfully submitted,
